Atlas of Longing

15 regions on an interactive globe

An interactive, rotating globe — chosen to avoid the distortions of flat map projections — showing that longing is not universal in form: the same motif takes on a different meaning and urgency depending on where and how a person lives.

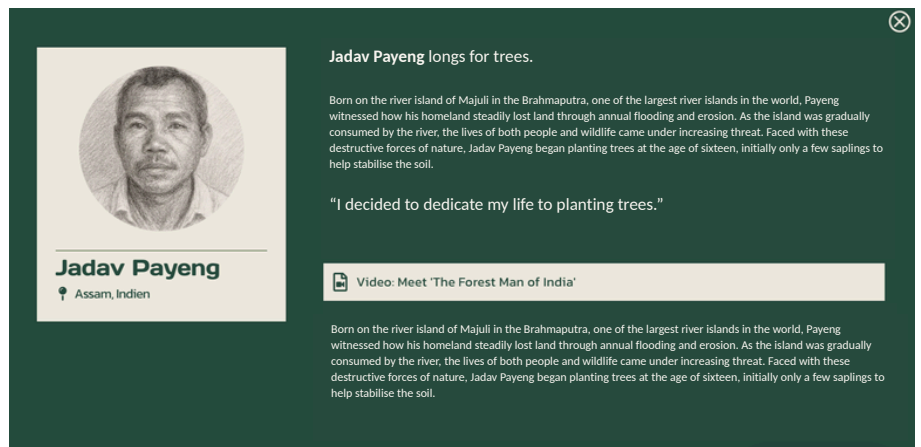

Photo 2 — a single case, detail view

At a glance

- Format: interactive 3D globe with regional case examples
- Content per case: short biography, quotes, images and thematic focus
- Reveals: shared motifs (security, belonging, freedom, an intact environment) shift in meaning across cultural and political contexts
- All fifteen planned regions and case examples were completed
